## INTRODUCTION OF NEW PRODUCT: HYO JIN FM APPROVED PVC EXHAUST DUCT

**AGRU Technology** is glad to introduce our new product; **HYO JIN FM Approved PVC Exhaust Duct**; the world's first thermoplastic systems, that has **FM 4922** approval.

The HYO JIN PVC FM 4910/4922 system is a fully engineered system of PVC FM Approved Exhaust duct and accompanying accessories. The system is designed with its durability, and chemical resistance, hence providing minimum maintenance.

Major advantages of this system are as follows :

- 1) **Cost Competitiveness** - especially the smaller size range
- 2) Ease of **installation** – by solvent cement or hot gas welding
- 3) Ease of **modification** on site – no need of special equipment/ skill
- 4) Stock **available** – short lead time from the factory
- 5) Corrosion proof – Major advantage where corrosion is an issue. **No corrosion**, less shut down time.
- 6) **Light weight** – less need for heavy-duty support and hoisting equipment
- 7) **Low Maintenance Cost**

HYO JIN is available in a wide range of pipes (square and round) and standard fittings from as small as 50A diameter up to 400A. With FM Approved Sheets available, special sizes and fittings can be fabricated to suit individual project requirements.

Nevertheless having FM approved product contributes to the overall **safety** of the facility as well as the people working in the facility.

Please contact us at [sales@agrutech.com](mailto:sales@agrutech.com) for a no obligation presentation of our product.
